Monitoring for Systemic Impact and Results

Global Food Security Strategy

- *...Our approach will build inclusive, competitive, and resilient food and agriculture systems to help ensure the sustainability of food security and nutrition outcomes ...*
- *...A strong understanding of the system in which we work when we strategize, plan, and implement development assistance will be critical to ensuring the sustainability of our investments. Our facilitative interventions aim to stimulate change and build local capacity rather than take a direct role in the system or create a parallel system...*
- *...U.S. Government teams in each target country will determine which components of the Results Framework are most applicable in their country context and which causal linkages will have the greatest potential for change...*

FEED THE FUTURE

The U.S. Government's Global Hunger & Food Security Initiative

Goal: Sustainably reduce global hunger, malnutrition, and poverty

Objective 1: Inclusive and sustainable agricultural-led economic growth

Objective 2: Strengthened resilience among people and systems

Objective 3: A well-nourished population, especially women and children

IR 1
Strengthened inclusive agriculture systems that are productive and profitable

IR 2
Strengthened and expanded access to markets and trade

IR 3 Increased employment and entrepreneurship

IR 4 Increased sustainable productivity particularly through climate-smart approaches

IR 5 Improved proactive risk reduction, mitigation, and management

IR 6 Improved adaptation to and recovery from shocks and stresses

IR 7 Increased consumption of nutritious and safe diets

IR 8 Increased use of direct nutrition interventions and services

IR 9 More hygienic household and community environments

Cross-cutting Intermediate Results:

CC IR 1 Strengthened global commitment to investing in food security

CC IR 2 Improved climate risk, land, marine, and other natural resource management

CC IR 3 Increased gender equality and female empowerment

CC IR 4 Increased youth empowerment and livelihoods

CC IR 5 More effective governance, policy, and institutions

CC IR 6 Improved human, organizational, and system performance

Effective response to emergency food security needs

Complementary results – Long-term food security efforts benefit from and contribute to complementary work streams that promote:

Economic growth in complementary sectors

Healthy ecosystems and biodiversity

Stable, democratic societies that respect human rights and the rule of law

A reduced burden of disease

Well-educated populations

5Rs Framework

Behaviors-Relationships-Conditions Framework

Framework for Understanding Systemic Change

Boundaries

What They Have in Common

- The system is bound by geography, environment, commodities, etc.
- Conditions, and rules (formal and informal), history influence how the system will change.
- Relationships between various agents affect the system—either because the change is significant enough or because there is a snowball effect in behavior change to lead to a change.
- USAID traditional monitoring efforts focus on certain aspects of systemic change—but there is a missing middle!

10 Minute Sessions

What's the Issue?

Tatiana Pulido on Systems Mapping

Gwenyth Coates on Results Frameworks

What's Going on?

Mike Field on Tools to Measure System Health

Jeremy Davis on mobile data collection and cloud information systems

Learning and Managing

John Avila on learning and decision making in multisectoral programming

Adaptive Management Happy Hour
