101 Exercise Instructions

Step 1: As you reflect on your project:

- Discuss and agree on

  - What are the important constraints in your context?
  - Choose 1 problem/constraint area to work with in the GIF format.

Step 2: After choosing your 1 problem/constraint area:

- Walk through the rest of the GIF for your chosen problem area.

- Fill in each column appropriately for your problem/constraint area.

- During your conversation…

  - Keep track of what additional information you would want to know.
  - Broadly interpret the domains of the GIF beyond the context of agricultural production.

Step 3: Reporting out:

On flipchart paper, capture:

- Your chosen constraint/problem area – be prepared to share why you chose this.

- Your responses to each of the GIF columns for that constraint/problem area.

- Share highlights from your group discussion, including:

  - What additional information would you want to know?
  - Where would you get this information?
  - What's missing, if anything?
