FROM THE AMERICAN PEOPLE

# **Risk Management in the context of Feed the Future**

Lena Heron  
USAID Office of Agriculture

CSO July 2011

## Pay Attention to Risk!

- Risk makes people poor;
- Risk keeps people poor;
- FTF strategies for increased productivity assume access to finance, adoption of technology and the willingness and ability to take on risk;
- Inclusive Ag-led growth requires increasing the participation of the rural poor—requires them to overcome their (appropriate) aversion to risk.

# Risk Management Framework

## I4 Learning Agenda for Index Insurance

- Eight pilots in a range of contexts;
- Testing applications for both value proposition and social protection agendas;
- Risk transfer—not a “zero sum game”, but crowds-in access to finance, technology adoption and self investment by shifting the risk profile of households.
- How can elements of risk management framework leverage and reinforce each other?
