JOINT ANALYSIS: DYNAMICS OF PASTORIALISM IN THE HORN OF AFRICA

Moving Up, Stepping Up, Moving/Moved Out

Long-Term Trends impacting viability of pastoralist livelihoods

- Commercialization and herd consolidation
- Resource degradation, reduced access to and competition over rangeland resources, climatic shocks
- Marginalization and underinvestment

Outcomes by sub-group (current status of population)

- Moving Up
  - Commercial and thriving
  - Enhanced efficiency of livestock value chain
- Stepping Up
  - Vulnerable but viable
  - Diversification of livelihood opportunities
- Moving Out
  - Vulnerable and exiting
  - Exit

Strategic Interventions (2012 to 2017)

Transitioning out of pastoralism (TOPs)

Thriving Drylands Economy
